

Arch 150
2 Part Tutorial
3D Terrain Models

**Part 2: Adding texture to
the terrain model**

Texturing a terrain model with a .JPG image makes it more realistic. Options include (but aren't limited to):

- a line drawing from AutoCAD converted in Photoshop to a .JPG
- a photo of a material or texture
- a satellite image from Google Earth

- New Ctrl+N
- Open... Ctrl+O
- Save Ctrl+S
- Save As...
- Save A Copy As...
- Save As Template...
- Revert
- Send to LayOut
- 3D Warehouse
- Export
- Import...**
- Print Setup...
- Print Preview...
- Print... Ctrl+P
- Generate Report...

SITE

Then, with
the object
selected,
right-click
and select
Explode.

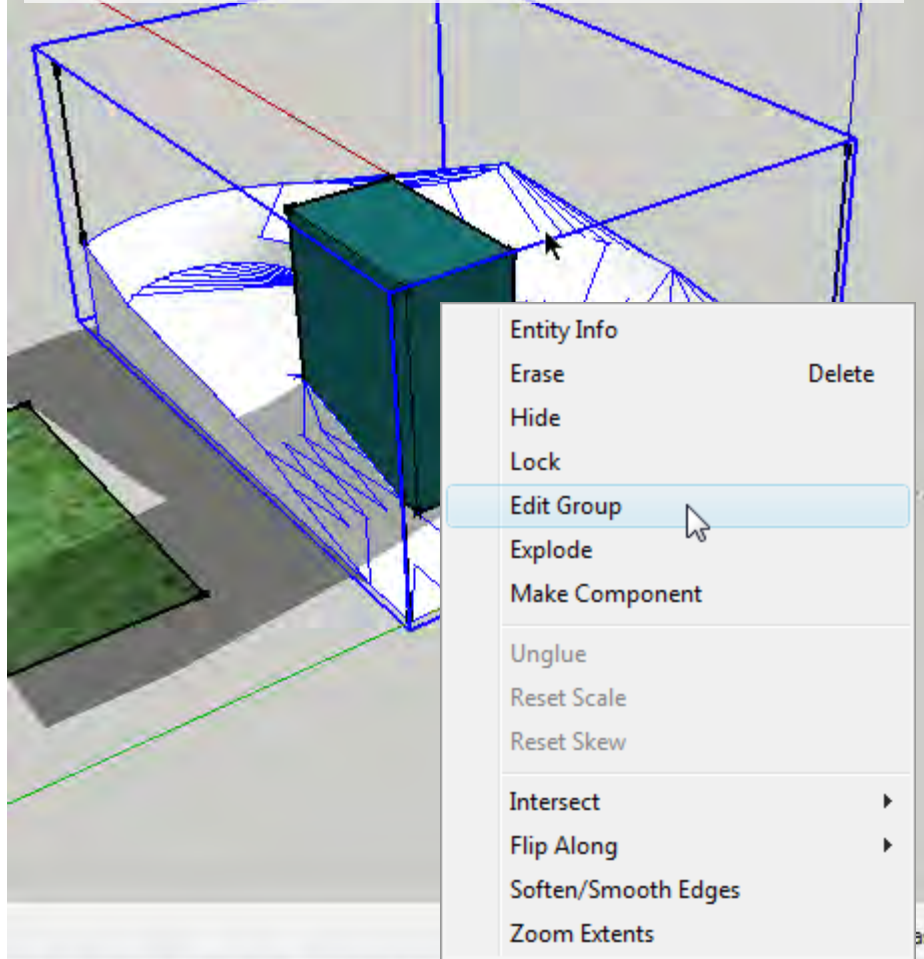

The image must be scaled: draw a few guidelines from the terrain model as guides – they should all be the same height, we'll use them to position the image over the model.

Before scaling, we must place the image *within* the terrain group: select the image and copy: **Ctrl + C**

Then select the model, right-click and select **Edit Group**

Paste the image within the group,
locating it at a corner point set by
the guides: **Ctrl + V**

Measurements

Scale the image to fit to terrain model:
Tools menu > Scale

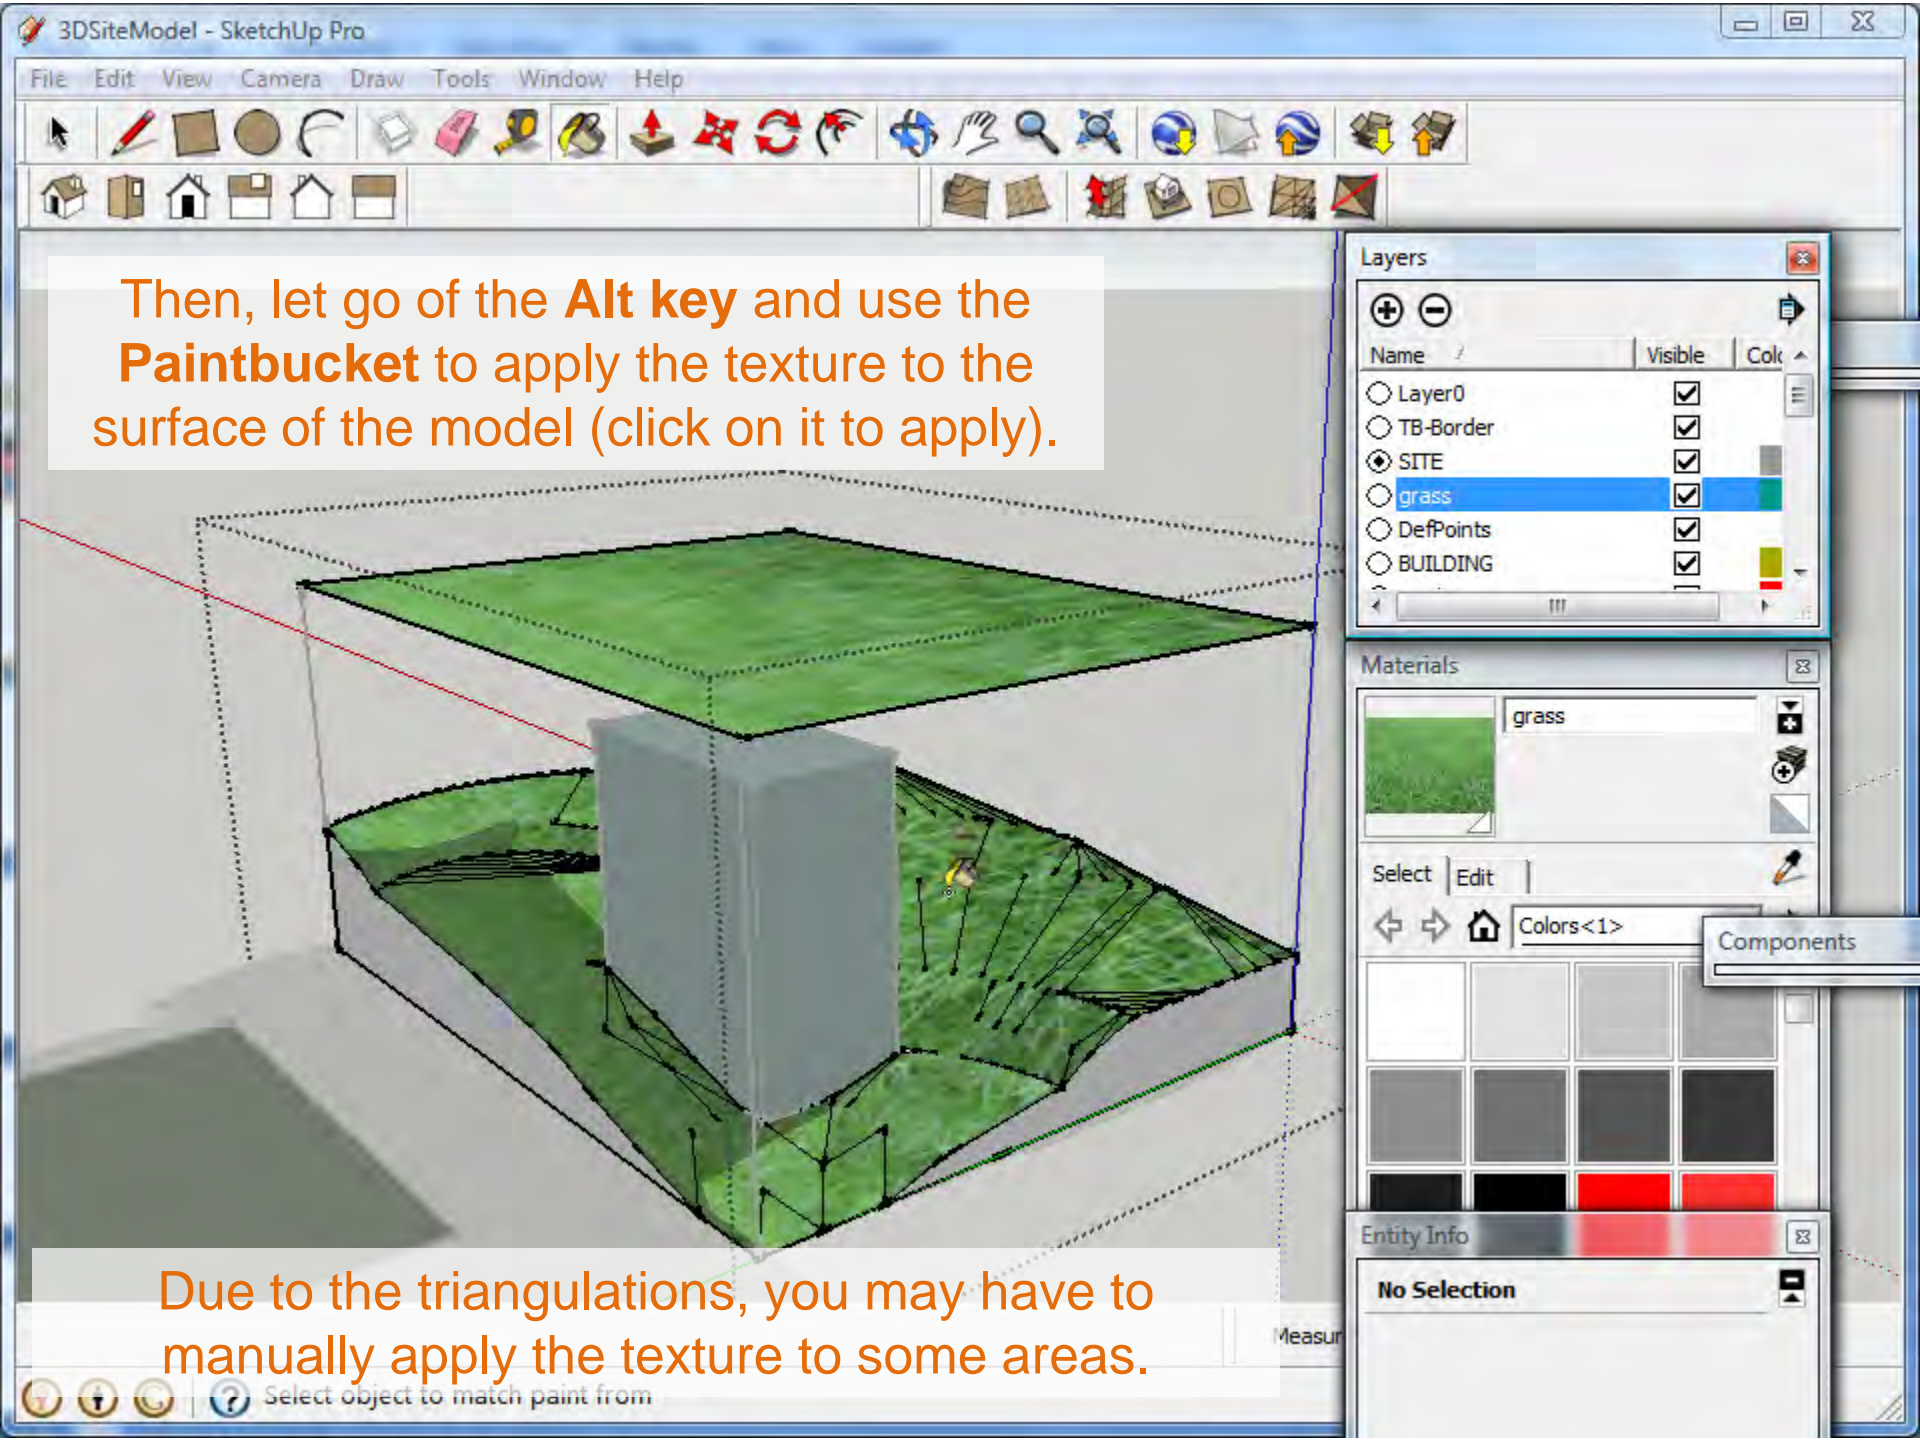

Click the image to scale it. Use the handles to align the corners with your guides. Note: Midpoints handles can be used to stretch the image if necessary.

Activate the **paintbucket tool** and press the **Alt** key to obtain the **Eyedropper**.
Click on the image to select it.

Then, let go of the **Alt key** and use the **Paintbucket** to apply the texture to the surface of the model (click on it to apply).

Due to the triangulations, you may have to manually apply the texture to some areas.

Drag the **Eraser Tool** across lines while **holding the shift key** to remove stray lines.

Go to **Window menu > Soften edges** to smooth the surface appearance.

Length

For next week, revise the topography model developed in this week's class and add your shade structure design to it.

Keep the surrounding contextual buildings *neutral* (white or gray) to allow focus to be on your design work.
